

FORMA

Simulations/Animations

FORMA produces computer simulations for development, environmental, graphic and courtroom presentations.

Our goal is to provide a clear and concise “before” and “after” scenario with accuracy and graphic detail necessary to convince persons responsible for sales or project approvals.

We strive to provide state-of-the-art techniques in producing simulations. FORMA utilizes complete CADD, GIS, 3D modeling, and video to create the final product.

Our distinctive work has painted a new horizon for our clients in the marketplace as leaders in communication and creativity.
